# THE ADVANTEC ADVANTAGE

## RELIABILITY

With over 150 years of collective experience in the design, engineering and manufacturing of marine closures, we are one of the leaders in North America for marine closures.

## SERVICEABILITY

We offer onsite commissioning, annual maintenance, repairs and replacement parts.

## MARKET LEADERS

As one of the largest manufacturers in the world, delivering standard and custom doors, windows, specialty glass, hatches, cranes and accessories for all kinds of marine applications.

## “INDUSTRY-LEADING” HASSLE-FREE WARRANTY

We are committed to delivering solutions that meet our customer’s requirements. We offer after-sales service and commissioning support for all products sold.

### All Non-Powered Equipment:

- Platinum Warranty - 36 months from the date of shipment

### All Powered Equipment:

- Standard Warranty - 24 months from the date of shipment
- Onsite commissioning required by AdvanTec Marine or certified technician for an additional 12-month extension

## OUR CERTIFICATIONS

### Welding Workshop Approval Certified by DNV-GL (WWA DNV-GL)

Guarantees high quality for all the important parts of ships, maritime installations and their components, our DNV GL rules require that welding work be carried out by approved companies or workshops.

SGCC

SGCC is the third party sponsor of a certification program, which provides for the certification of safety glazing materials and glass tempering.

### International Organization of Standards (ISO 9001-2015)

ISO 9001 is defined as the international standard that specifies requirements for a quality management system (QMS).

### International Organization of Standards (ISO 614-2012)

Certification in Ships and marine technology – Toughened safety glass panes for rectangular windows and side scuttles – Punch method of non-destructive strength testing.

**CWPCA®**  
**ACPCB**

### Canadian Wood Pallet & Container Association (CWPCA)

The Canadian Heat Treated Wood Products Certification Program (HT Program) is an official certification system for the export of wood products to countries requiring heat treatment prior to entry.

Freeman Marine products are found on government lifeboats and patrol boats, as well as on utilitarian commercial fishing vessels and supply rigs. Freeman Marine is proud to be respected for its products, quality and the relationships it strives to build with every client. Freeman Marine looks forward to the opportunity to serve you.

First focusing on the marketplace's need for a better commercial deck hatch, Freeman Marine today sells more styles, sizes and shapes of cast aluminum deck hatches than most other manufacturers on a global scale.

Freeman Marine offers an extensive line of cast and precision-machined portlights, a wide range of window types, and duty grades for vessels from under 30' to well over 300'.

Diamond Sea Glaze designs and manufactures custom windows, boat doors, deck hatches, and glass for customers. We deliver what our customers demand: sleek, strong, and secure closures. DSG closures have quality built in – so everything else stays out. Each order is manufactured separately from beginning to end in our 80,000 sq. ft. vertically integrated plant outside Vancouver, Canada.

We are one of a few closure manufacturers in the world that insists on processing our own glass so we can ensure optimum quality control.

Steelhead Marine's full line of high-quality boat cranes is a direct result of nearly two decades of continuous research, development and constant improvement.

Founder and industry visionary, Dan Thain, had an insatiable desire to create a better boat crane. He employed an aircraft engineering team to work with him to study crane design to create prototypes using aeronautical principles and materials.

With strong leadership and a dynamic workforce, Steelhead is working to take its innovative products to the next level of sophistication. A diligent sales, engineering, design and build process combined with a close working relationship with their clients ensures that Steelhead products will be at the forefront of innovation in the global yacht market.

Pacific Coast Marine is one of the world's largest manufacturers and suppliers of high-quality yacht doors, windows, and hatches. PCM has nearly 30 years of experience with projects including superyachts, semi-custom yachts and production yachts.

We began building our reputation nearly 30 years ago by supplying high-quality yacht closures for use in the North Pacific Ocean. Today, our commitment to personalized service, regardless of the size and complexity of the project, sets us apart. In addition, PCM offers competitive pricing, innovative product designs, and high-quality yacht products. As a result, PCM has evolved to become the global leader in manufacturing and supplier of yacht closures.

**USA  
SLIDING  
DOORS**

USA Sliding Doors are manufactured in our AdvanTec Manufacturing USA to meet The Jones Act and Buy American requirements. We produce high-quality electro-hydraulic and all-electric watertight sliding doors. Our doors are custom designed and engineered for easy installation with standard hand tools. In addition, our watertight doors are reliable and easy to maintain. We are specialists in designing and manufacturing both marine and land-based door closures.

USA Sliding Doors serves the Maritime and Civil Industry. We have supplied watertight doors for the US Navy, Foreign Militaries, and multiple Commercial and Civil applications.

We are known for our Class II and Class III vertical and horizontal watertight doors. We are a US Certified Vendor under Cage Code N. 1TML7, which allows us to supply the US Navy with doors found on the T-AKE, MLP/ESB, T-AGM and T-AO vessels. Our doors can be custom designed to meet Class and Shipyard requirements.

Manly Marine is Canada's leading producer of watertight sliding doors for personal and cargo applications. Our products are designed and manufactured according to Canadian content requirements. Manly has been catering to the Canadian maritime industry since 1946 and carries forward the tradition of innovation and high quality.

Manly Marine proven products are trusted by the Royal Canadian Navy and many other governments and commercial shipyards. As one of the best commercial duty manufacturers of class-approved sliding watertight doors in the industry, we work closely with all major classification societies, including the American Bureau of Shipping, Lloyd's Register, Bureau Veritas, Det Norske Veritas and Transport Canada.

Manly Marine's most recognized accomplishment was producing Canada's largest ever sliding electric watertight cargo door. The door was constructed to meet Class requirements, which included a closing speed of 35 seconds and full operational capability when the vessel is at a 15° list.
