MAGIC CLOUD

The architecture of light.

MAGIC CLOUD is a customizable, made-to-measure and made-to-order illuminated panel with uniform lighting emission, even in irregular shapes, and customizable mounting systems to suit the needs of the project.

Thanks to its cutting-edge technology, **MAGIC CLOUD** guarantees uniform lighting in a very low thickness, creating a magical and welcoming atmosphere.

It is ideal for the architectural and design sector, as it allows for the creation of suggestive and original environments, but also for the Lighting sector as it offers noteworthy illuminotechnical properties.

Primarily used to create illuminated surfaces such as floors, ceilings or walls, **MAGIC CLOUD** is also the best solution for backlighting other translucent materials such as stones, resins, perforated metals, decorative glasses, and many others.

It is also possible to print any high-resolution image on the surface of the illuminated panel.

Technical Specs

COLOR TEMPERATURE	 <p>2000 K 2700 K 3000 K 3500 K 4100 K 5000k</p> <p>Tun. White 2000-6500K Tun. White 2700-6500K Custom range Tun. White* RGB RGBW* RGBTW* DIM to WARM*</p>
	*Under request for a minimum order quantity to be define.
CRI	> 95
INPUT VOLTAGE	24VDC
DRIVER	AC DC 24V DC OUTPUT (class 2 Power Unit)
DIMMABILITY	by all existing systems (ELV/MLV, 0-10V, DALI, LUTRON, DMX ...)
POWER CONSUMPTION	Standard output 14 W per linear mt (4,5 W per linear ft) High output 28 W per linear mt (9 W per linear ft)
LUMEN DELIVERED	Standard output 890 lm per linear mt (290 lm per linear ft) High output 1780 lm per linear mt (580 lm per linear ft) of the longer side
IP GRADE	IP40 for Dry Location (IP54 for Damp Location under request)
DIMENSIONS	<p>WIDTH MM widht 203.2 to 2006.6 mm INCHES widht 8.0 to 79.0 in</p> <p>LENGTH MM widht 203.2 to 3048.0 mm INCHES widht 8.0 to 120.0 in</p>
WEIGHT	5.7 lbs/sq. ft (25 kg/sq. mt)
LIFE TIME	70.000 hrs
WARRANCY	3 Years (36 month)
CERTIFICATIONS	

Sizes

WIDTH	LENGTH (height)
CUSTOM	CUSTOM
MIN - 203.2 mm (8")	MIN - 203.2 mm (8")
MAX - 2006.6 mm (79")	MAX - 3048 mm (120")

Maximum measurements depend on the scope of work and you will find them on the following dedicated pages.

Ceiling mounting Fastmount

Section | Ceiling mounting - Fastmount | Max WIDTH 304,8 mm (12 in) Max LENGTH 3048 mm (120 in)

SURFACE MOUNTING
FASTMOUNT

RECESSED MOUNTING
FASTMOUNT

* The EXISTING SURFACE must be flat. | uniform lighting custom size

Installation manual | Ceiling mounting - Fastmount

1

Position the template (supplied). It is recommended to be in more than one person. (The template has exactly the same size of the light panel).

2

Drill trough all the holes you will find on the template. These holes will be needed for fischers (not included).

3

Remove the template and insert all fischers according to the type of surface (not included).

Installation manual | Ceiling mounting - Fastmount

4

Screw all clips supplied using countersunk screws. The screws are not included, make sure that will be perfectly flush with the clips, otherwise, if deeper, the system will not work properly.

5

Once the cable coming from the remote 24VDC driver is connected, lift the panel avoiding any bending or deforming, match the clips and push. Note: check that all clips are working properly.

6

SCREWS

* Number of HOLES depends on the size and weight.

** The EXISTING SURFACE must be flat.

Installation manual | Ceiling mounting - Screws

1

Position the template (supplied).
(The template has the same overall size of the light panel).

2

Make all the holes (keep the template still;
if needed you can screw it).

3

Remove the template.

Installation manual | Ceiling mounting - Screws

4

Once the template is removed, Insert the fischers (not supplied) it is important to use all the holes.

5

Connect the cable coming from the remote 24VDC driver.

6

Lift the panel and screw (screws not supplied).
Make sure that the cups of screws are not deeper then 3mm.

Installation manual | Ceiling mounting - Screw

- 7** Position the iron frame magnetically (supplied).
If need, you can create a decorative frame
to glue on the iron frame.

Installation manual | Ceiling mounting - Screw

Ceiling mounting

Frame
by others

Section

Ceiling mounting - Frame by others |

Max WIDTH 1371,6 mm (54 in)
 Max LENGTH 3048 mm (120 in)

FRAME OVERLAP *	
PANEL WIDTH (short side)	OVERLAP
until 609.6 mm (24")	12.7 mm (0.5")
from 609.6 (24") to 1219.2 mm (48")	25.4 mm (1")
from 1219.2 (48") to 1371.6 mm (54")	50.8 mm (2")

Suspended
by steel cords

Section | Steel cords - Shy plus | Max WIDTH 914,4 mm (36 in) Max LENGTH 3048 mm (120 in)

* Number of HOLES depends on the size and weight.

Installation manual | Steel cords - Shy plus

1

Position the template (supplied).
Note: The template has the same size of the lighting panel.

2

Make all the holes for the fishers.
(Fishers are not supplied, use the right model according to the type of surface).

3

Once the template is removed insert all fishers.

Installation manual | Steel cords - Shy plus

4

Position and screw the hangers.
(Hangers are supplied, screws are not supplied)

5

Lift the panel, insert the steel cords on the hangers and
connect the cable coming from the remote 24 VDC driver.

Once the panel is leveled cut the excess steel cord.

** The EXISTING SURFACE must be flat.

Installation manual | Wall mounting - Fastmount

1

Position the template (supplied) help with the integrated level. The template has exactly the same size of the light panel.

It is suggested to screw the template on wall once have found the right position.

2

Drill trough all the holes you will find on the template. These holes will be needed for fischers (not included).

3

Remove the template and insert all fischers according to the type of wall (not included).

Installation manual | Wall mounting - Fastmount

4

Fix the clips and the "L" profile supplied using countersunk screws (not supplied).

Note: the screws must to be perfectly flush with clips and "L", otherwise, if deeper, the system will not work properly.

5

Once the cable coming from the remote 24VDC driver is connected, sit the panel on the "L" profile and push.

Note: check that all clips are working properly.

Possible extra works

MITERED END 2D

The ends of each lamp can be customized to obtain different geometric figures with a 2D effect.

MITERED END 3D

The ends of each lamp can be customized to obtain different geometric figures with a 3D effect.

RUN

More fixtures can be combined to obtain longer runs since the visibility of the seam is clean.
